Subject: Latest test results from SG
Attachments: IISProxy (17).pdf

Good afternoon Ms Dunn, as you can see by the latest test results from SG, the numbers are still extremely high, and do not seem to be getting any lower.

We keep asking ourselves in Merrimack why these numbers continue to exceed State limits and it seems that nothing is being done by NHDES. As I have mentioned previously this is the groundwater that runs into our Brooks and Rivers and further contaminates our drinking water as these Brooks and Rivers are our main source of drinking water.

Also you will see in the test results that there are many more chemicals that are showing up in our water at consistently higher levels as well.

Again I thank you for your time and attention.

Katharine Hodge
